📍 Silesia, (Remote / Hybrid)

PROFESSIONAL SUMMARY

Highly accomplished **Lead SDET and Software Engineer** with over **8 years of expertise in Python** and a track record of building scalable, high-performance automated frameworks. Specialized in designing complex system-level verification protocols and integrating AI-driven methodologies to optimize development and testing workflows. I maintain a continuous portfolio of independent projects utilizing **Node.js, TypeScript, and SQL**, and I leverage advanced AI tools to enhance code quality and operational efficiency. I am seeking to apply my background in embedded systems and mobile automation to drive technical excellence in a regulated healthcare environment.

TECHNICAL SKILLS

- **Languages:** Python (Expert - 8 years), JavaScript/TypeScript, Node.js, SQL, C++, Bash/PowerShell.
- **Testing & QA:** Pytest, Selenium, Appium, Appium Classifier Plugin, Airtest Project (Poco), Appium Device Farm, JMeter, Locust, API Testing (REST/SOAP).
- **AI & Algorithms:** Heuristics (A* Vector Pathfinding), Data Mining, Web Scraping (Scrapy, BS4), Procedural Generation.
- **Infrastructure & DevOps:** Docker, Jenkins, Git/Bitbucket, CI/CD Pipelines, Linux, Hybrid Cloud.
- **Domain Knowledge:** Embedded Systems, PLC, CNC Diagnostics, Microservices Architecture.

PROFESSIONAL EXPERIENCE

Lead Software & AI Engineer (R&D / Independent Projects) | Ongoing

- Architect and implement innovative algorithmic engines and AI models, including vector pathfinding and procedural L-Systems.
- Develop high-performance backend architectures using Python (FastAPI, Flask) integrated with relational and non-relational databases.

CURRICULUM VITAE

- Build advanced Data Mining systems for automated scraping, aggregation, and anomaly detection in massive datasets.
- **Continuous Learning:** Actively developing and deploying diverse projects on Render.com using Node.js and TypeScript to solve complex software challenges.

Systems Diagnostics & Acoustics Specialist | Rek-Pol | 03.2024 – 10.2024

- Performed advanced data analytics on measurement data and technical diagnostics for complex acoustic and lighting systems.
- **Developed automated analytical reporting tools using SQL and Python to support critical engineering decisions.**

Senior QA Automation Engineer & Data Analyst | Moto-Profil | 01.2020 – 03.2022

- **Leadership & Mentoring:** Led and trained a team of 3 automation testers in mobile testing technologies, including **Appium Classifier Plugin, Airtest Project (with Poco library), and Appium Device Farm.**
- Designed and deployed advanced regression and integration test frameworks from scratch using Python, Pytest, and Selenium.
- Implemented an intelligent Big Data analytical algorithm for competitor price monitoring, optimizing marketing processes by 30%.
- Conducted load and performance simulations (JMeter, Locust) for high-traffic distributed web applications.
- Automated CI/CD pipelines via Jenkins and integrated quality management through Jira/Xray.

Embedded Systems & CNC Engineer | Pol-Eko Aparatura | 07.2017 – 12.2019

- Created and optimized low-level control scripts for CNC machinery within embedded environments.
- Performed hardware diagnostics, process validation, and log analysis for control systems (PLC, inverters).

EDUCATION

- **B.Eng. in Software Engineering** | WSTI Katowice (2017–2026).
- **Cisco Certificate.**
- **Technical Training:** Technician Electronics (2012–2016).

LANGUAGES

- **Polish:** Native.
- **English:** B2 (Professional Working Proficiency).
- **Spanish:** Basic.
